Portfolio: I haven't built it yet

Professional Summary

Computer Science graduate and aspiring web developer who builds responsive, interactive websites with HTML, CSS, JavaScript and React. Experienced in working with a mentor and a teammate on a shared codebase, fixing bugs in my own code and testing pages on different screen sizes. Detailoriented, self-motivated and comfortable working independently, with a basic understanding of networking. Seeking the Web Development Internship at The GAO Group to gain hands-on experience on real projects and grow under professional mentorship.

Technical Skills

- **Web Development:** HTML5, CSS3, JavaScript (ES6+), React (components, JSX, hooks), Tailwind CSS
- **Responsive Design:** Mobile-first layouts, testing across screen sizes and browsers
- **Troubleshooting:** Debugging with browser DevTools, fixing JavaScript and layout issues
- **Tools:** Git, GitHub, VS Code
- **Fundamentals:** REST APIs (connecting a frontend to an API), basic networking • **Currently learning:** Back-end basics (Node.js, Express, MongoDB)

Projects

PayLab – Mock Digital Wallet App (Team Project) | React, Tailwind CSS, REST APIs, Git/GitHub

- Worked with a mentor and a fellow student on a peer-to-peer wallet web app, focusing on the frontend
- Built the user interface: signup/login screens, wallet dashboard, send-money flow and transaction history
- Connected the interface to REST API endpoints for authentication, wallet balance and transfers
- Made the layouts responsive for mobile and desktop, and collaborated through GitHub

To-Do List App | HTML, CSS, JavaScript, React

- Built a task manager with add, complete (checkbox strikethrough) and delete features
- Used localStorage so tasks persist after the page is refreshed
- Rebuilt the app in React using components, JSX and the useState hook • Debugged my own code and presented a walkthrough of how it works

Education

Federal Polytechnic Ede, Ede, Osun State, Nigeria - HND in Computer Science | 2018 – 2021 **Omoladun Comprehensive College** , Ibadan, Oyo State, Nigeria | [2014]

Why This Internship

I have always loved technology and I am committed to a career in web development. This internship is the right next step: I want to apply my HTML, CSS, JavaScript and React skills to real websites, learn how professional teams build and maintain them, and grow through mentorship while working remotely.

Strengths

Fast learner | Detail-oriented | Self-motivated | Team collaboration | Clear communication | Comfortable working remotely
